**Our furnaces in Crystal Valley have long been used by glass artisans to sculpt premium Bohemian crystal.**

#### ORIGINAL TECHNIQUES OF GLASSBLOWING

We use sodium-potassium crystal glass, adding colour additives directly to the furnace pots during the melting process. This technique ensures the richest and most vibrant hues in our glassware.

**The factory was saved from bankruptcy and a new era of close family collaboration has begun.**

**THE OLDEST GLASS FACTORY IN CENTRAL EUROPE**

Located in the mecca of glassmaking - Kamenický Šenov, Czechia. The glass factory we still use today was built by none other than the same French engineers who constructed the Eiffel Tower.

"The history of Czech glassmaking runs deep and I like the feeling that we are continuing its legacy. For me, it was very important for KLIMCHI to be strongly connected with the roots and spirit of its home, the people and their craft."

## Country club 2.0

Pressed white table linen might be too much faff, but this is still a pinkies-out kind of set-up, where the wines are almost as sparkling as the conversation and the plates might just be family heirlooms. It's a more modern take on one-percenter chic, though, with scalloped edges, bud vases and candles ready to carry you into the wee hours.
